Schools and institutions need AV solutions that fit the space, match the budget, and keep performing for years to come. That's where Derringers can help.

Every enquiry starts with a conversation with our **Education Specialist Consultants**. We'll chat through your goals, ideas, timelines, and how the space is actually used, then come back with clear recommendations based on your needs.

From there, we can arrange a site visit at a time that suits you. This helps us confirm the practical details, fine-tune the plan, and put together a complete, accurate quotation. And once you've got the quote in hand, we're here to answer questions and help you choose the right approach - with no pressure.

We support everything from **simple, reliable sound systems** for assemblies and sports days through to **fixed installations** for larger venues. Our range covers **professional audio, lighting, and AV** for assembly halls, music rooms, school theatres, canteens, and classroom applications.

After installation, we also provide **hands-on training** so your team can feel confident using the system day-to-day. This can include interactive tech, LED screens, audio and lighting consoles, wireless microphones, DJ equipment, and more - so you get the best performance and smooth-running events.

Call Derringers for a proposal based on your needs today!
